

Static camouflage is a modular, weather-resistant solution designed to conceal vehicles, equipment, personnel and infrastructure. Its unique 2D structure creates a three-dimensional effect using only a single layer.

Available versions: optical (UV, VIS, NIR, TIR) and multispectral (UV, VIS, NIR, TIR, RADAR).

BENEFITS

MULTISPECTRAL

MODULAR

DOUBLE-SIDED

LIGHTWEIGHT

CUSTOM-DESIGNED

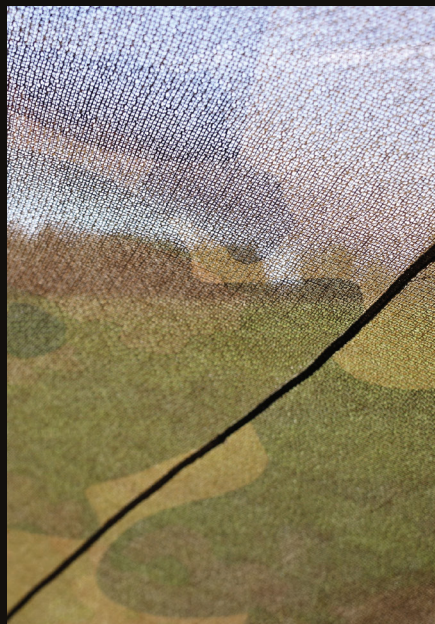

FIRE-RESISTANT

2D STATIC CAMOUFLAGE (UV, VIS, NIR, TIR, RADAR)

 OPERATING SPECTRUM	 UV RADIATION	 VISIBLE SPECTRUM (VIS)	 NEAR-INFRARED (NIR)
 THERMAL INFRARED (TIR)	 RADAR		

CHARACTERISTICS

Equipped with support sets adapted for use in various terrain conditions. Each system is designed with the characteristics of the operational environment in mind, while the pattern, colour scheme and parameters can be tailored to individual requirements. Available in single- or double-sided versions. Easy to maintain and repair under field conditions.
