

The anti-drone poncho is an individual camouflage garment for a single soldier, providing highly effective protection against detection. It was designed as a direct response to the increased activity of drones equipped with thermal imaging cameras. The solution provides multispectral protection (VIS, NIR, TIR) while maintaining user comfort.

BENEFITS

**PROTECTION AGAINST
DRONE DETECTION**

**ERGONOMIC
DESIGN**

**BREATHABLE
CONSTRUCTION**

**ADAPTIVE THERMAL
CAMOUFLAGE**

**PATTERN AND COLOUR SCHEME
ADAPTED TO THE ENVIRONMENT**

ANTI-DRONE PONCHO (VIS, NIR, TIR)

OPERATING SPECTRUM

VISIBLE SPECTRUM
(VIS)

NEAR-INFRARED
(NIR)

THERMAL INFRARED
(TIR)

CHARACTERISTICS

The design allows natural vegetation to be easily attached, increasing camouflage effectiveness in the operational environment.

The anti-drone poncho effectively reduces the thermal signature, thereby increasing survivability on the battlefield.

Available in various colour variants.

Supplied in a durable camouflage-printed bag.
